Comments: I am already a very satisfied customer since December 2003!! Because of the drought conditions we have had this year, I had more settling that concerned me. I called to have my home inspected for new movement. Chris came and answered my concerns. He said that so far the settling was just cosmetic and I needed to watch my home and if certain things happened, I should call back to report them.

I am happy to report that my home has stabilized and I do not hear any creaking or groaning now and my front door will stay closed without using my deadbolt! I never doubted your quality of work. I just needed reassurance from you about my present situation and to see if I needed to do anything different.

It is such a comfort to know that if I have issues after the work is performed, you will come and answer my questions and concerns. With all the foundation repair businesses "coming out of the woodwork" with our present drought, I am so glad that I have you to consult with on my concerns. Thank you again for putting my mind at ease on the largest investment I will ever make!!

Donna Patton
